

# Aluminium Perforated Mesh Security Doors and Screens

**AlumatIn Aluminium Perforated Mesh offers top of the range security without compromising the clarity of vision. Its stylish appearance protects and adds value to any home.**

AlumatIn Aluminium Perforated Mesh is manufactured from high quality aluminium and it is designed to outperform most security products on the market.

It is pre-treated and powder coated in black with the highest quality powder available.

The unique design of the mesh provides security, strength and clarity of vision and its technical specifications also make it corrosion resistant and contemporary.

## Applications and colours

Alumatin Aluminium Perforated Mesh can be used in a range of commercial and residential applications.

- Hinged and sliding doors
- Window screens
- Security screens
- Patio enclosures

The aluminium security frames can be powder coated to match many existing window and door frames.

## Benefits

When using Alumatin Aluminium Perforated Mesh you ensure the clarity of vision is uncompromised.

Its stylish appearance blends in seamlessly with many architectural styles and it can be used in many applications.
