

316 Stainless Steel Mesh Security Doors and Screens

AlumatIn 316 Stainless Steel Mesh offers top of the range security without compromising the clarity of vision. Its stylish appearance protects and adds value to any home.

AlumatIn 316 Stainless Steel Mesh is manufactured from High Tensile Wire and outperforms most other security products on the market.

It is pre-treaded and powder coated in black with the highest quality powder available.

316 grade offers superior corrosion resistance to that of 304 grade.

Applications and colours

Alumatin 316 Stainless Steel Mesh can be used in a range of commercial and residential applications.

- Hinged and sliding doors
- Window screens
- Security screens
- Patio enclosures

The aluminium security frames can be powder coated to match many existing window and door frames.

Benefits

When using Alumatin 316 Stainless Steel Mesh you ensure the clarity of vision is uncompromised.

Its stylish appearance blends in seamlessly with many architectural styles and it can be used in many applications.
